

## Product Specifications

---

### ARCHITECTURE

---

- Runs on all Domino platforms
- No Domino architectural changes required
- Uses LotusScript-based agents
- Each server's agent is autonomous
- Server-based processing
- No additional network traffic
- Customizable, unique rules per group/person/server/others (connections,domains, etc...)
- All administration performed from single database

### INSTALLATION

---

- Easy Lotus Notes-based installation
- Installed from single Lotus Notes client to one server per domain

## Product Benefits

---

### RETURN ON INVESTMENT

---

- Automate current manual tasks
- Perpetually enforce document configurations
- Proactively locate possible issues
